9	REQ_FRIEND_002	Friend Request
10	REQ_LOGOUT_001	Logout

Requirement Description
User should be able to open login page
User should login with valid credentials
System should show error for invalid login
User should be able to create a post
User should see posted content on timeline
User should like a post
User should comment on a post
User should send friend request
User should accept friend request
User should logout successfully

Details
Social Media Manual Testing
Validate core functionality of the social media web application
Login, News Feed, Post Creation, Profile Management, Friend Requests
Functional Testing, UI Testing, Negative Testing, Regression Testing
Windows 10, Chrome Browser
Application build available, test cases prepared
All test cases executed and critical defects resolved
Test Plan, Test Scenarios, Test Cases, Bug Reports, Test Execution Report, RTM

18	TC_LOGOUT_001	TS_LOGOUT_001	REQ_LOGOUT_001

Module	Title	Pre-Requisite
Login	Verify login page loads	User has URL
Login	Login with valid credentials	User on login page
Login	Login with invalid password	User on login page
Login	Login with empty fields	User on login page
Login	Login with invalid email format	User on login page
Post	Create text post	User logged in
Post	Verify post appears after refresh	Post created
Post	Create long text post	User logged in
Post	Create post with emojis	User logged in
Reaction	Like a post	Post exists
Reaction	Unlike a post	Post liked
Comment	Add comment to post	Post exists
Comment	Add empty comment	Post exists
Comment	Add long comment	Post exists
Friend	Send friend request	User logged in
Friend	Accept friend request	Request received
Friend	Send duplicate friend request	Request already sent

Logout	Logout user	User logged in

Test Data	Test Steps	Expected Result
https://www.facebook.com/	1 Enter URL 2 Press Enter	Login page loads
valid email/password	1 Enter email 2 Enter password 3 Click login	User logged in
wrong password	1 Enter email 2 Enter wrong password 3 Click login	Error displayed
Blank	1 Leave fields empty 2 Click login	Validation shown
user@test	1 Enter invalid email 2 Click login	Error message displayed
Hello world	1 Click create post 2 Enter text 3 Click post	Post created
Hello world	1 Refresh page	Post visible
500 characters	1 Enter long text 2 Click post	Post created
☺☺☺	1 Enter emojis 2 Click post	Post created
N/A	1 Click like button	Like count increases
N/A	1 Click like again	Like removed
Nice post	1 Click comment 2 Enter text 3 Submit	Comment visible
Blank	1 Click comment 2 Submit blank	Validation message
Long text	1 Enter long comment 2 Submit	Comment displayed
Friend profile	1 Open profile 2 Click Add Friend	Request sent
N/A	1 Open requests 2 Click accept	Friend added
N/A	1 Click Add Friend again	System prevents duplicate request

N/A	1 Click profile menu 2 Click logout	User logged out

Actual Result	Status	Regression
Login page opened	Pass	
User logged in	Pass	
Error displayed	Pass	
Validation shown	Pass	
Error displayed	Pass	
Post displayed	Pass	
Post visible	Pass
